Baseball Dashboard

Brandon Hampstead & Lily Hoffman
Northeastern University

Our **Baseball Dashboard** enables users to explore specific teams, statistics, and years by generating a customizable line graph depicting trends between two selected teams. Users can analyze various stats, such as losses, wins, runs, and more, for a comprehensive understanding of differences and similarities between the teams. The dashboard features three dropdowns to select two teams and a statistic, along with a range slider to specify the years to be visualized on the graph. In the provided screenshot, you can observe the user's interest in comparing the number of wins between the PHI and BOS teams from the years 1980 to 2000.
